Basket Frame and Accessories

The flexibility of our accessories and adjustable frames allows you to tailor the basket internals to suit almost any requirement, all you do is pick your frame width and then choose an accessory or accessories ensuring that the sum of the internals is equal to or less than the compartment dimension size.

How to choose your frame size and accessories.

Example:

1) First step is to measure the internal cabinet width (ICW).

2) Once you have your ICW you can identify your frame size (see pull out frame table).

3) The next step is to figure out your working compartment dimension size (WCD) = ICW - 80mm.

4) When you have calculated this size you can select the accessories to suit.

1 - Basket Tray Low

The low basket tray is 86mm high steel plate, with a beech base.

- Grey epoxy finish
- 300mm wide

Code	Width	Depth	Height	Price	
262492	300mm	505mm	86mm	£61.16	€70.33

- Soft closing
- Full extension
- Adjustable + 140mm
- Side mounted
- Chrome wirework
- White framework

Basket Frame and Accessories

The flexibility of our accessories and adjustable frames allows you to tailor the basket internals to suit almost any requirement, all you do is pick your frame width and then choose an accessory or accessories ensuring that the sum of the internals is equal to or less than the compartment dimension size.

How to choose your frame size and accessories.

Example:

1) First step is to measure the internal cabinet width (ICW).

2) Once you have your ICW you can identify your frame size (see pull out frame table).

3) The next step is to figure out your working compartment dimension size (WCD) = ICW - 80mm.

4) When you have calculated this size you can select the accessories to suit.

1 - Basket Tray Low

The low basket tray is 86mm high steel plate, with a beech base.

Key Features:

- White finish
- Chrome wirework
- 300mm wide

Code	Width	Depth	Height	Price
